

Did you know?

Tools and resources to support your National Scout Organization's (NSO) implementation of a Membership Management System are available on the Growth Service platform.

A Membership Management System will:

Measure the impact of Scouting in your community and continuous improvements to your NSO's programme.

Strengthen the capacity of NSOs in Good Governance principles.

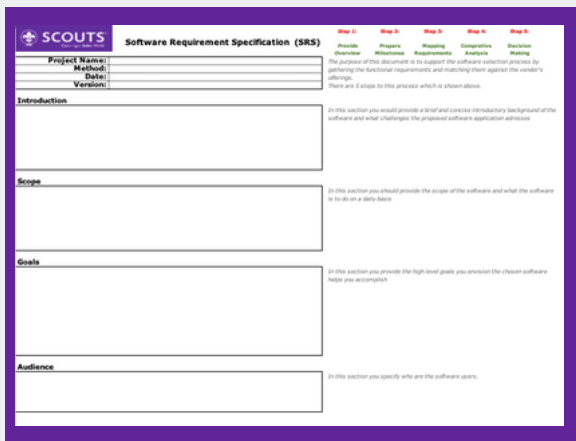

Capture data on membership and fee collection

Generate data and statistics to inform key decisions and shape the future of your NSO.

There are two main tools that will help with starting, updating and implementing a Membership Management System:

1. Membership Management System template

This resource enables NSOs to identify and record their desired requirements using the Membership Management Software. It should be used alongside the Membership Management System Toolkit.

ORGANISATIONAL DEVELOPMENT

MEMBERSHIP MANAGEMENT SYSTEM TOOLKIT

2. The Membership Management System Toolkit will enable your NSO to:

Learn about the standard requirements for an NSO.

Identify existing third party software or web tools on membership management.

Develop a feature matrix that supports a better understanding of how existing tools compare against standard requirements.

Request a Service for "in person" support:
